

27 July 70  
P.F.A.D.C. - FD. 82-70  
P. 11 JLB

Received in marking tape sealed box cont. br. paper bag labeled 137-70 cont two plastic bags stapled tog & seal tag "13 plastic vial cont. fingernail scrapings, hair samples, fibers & veg. samples taken from victim at Wash Army Hospital" marked on bottom of vial 17 Feb 70 BSH

#1 Mouth - area around mouth. (C+B)

fibers + one long hair

#2 Right hand Mouth (not marked by Browning)

sm. amt debris - 2 small fragments that could be hair, but no def. hair found nothing was wrapped up in the paper

#3 anterior pelvic smaller M. Donald child (C+B)

one piece of straw-like vegetation

#4 fingernail scrapings right hand larger M. Donald female child (not labeled by Browning)

2 sm. frag. + debris

#5 veg. scraping ESB.

#6 left hand (not labeled by Browning)

2 sm. frag.

#7 fingernail scrapings left hand smaller female M. Donald (not labeled by Browning)

1 hair? - 2 fragments

#8 fingernail scrapings left hand larger M. Donald female child (not labeled by Browning) 15

questionable hair fragment

#9 fingernail scrapings (R hand smaller)  
McCloud female (not labeled by LOB)  
3 fragments

E-4 #10 Hair (R hand) rather (LOB)

1 good hair  
1 ? hair or fiber

#11 skin abrasion opposite (R forearm) rather  
(not labeled LOB)

2 good fibers

#12 rather very scrapings

E-5 #13 left hand rather

all marks marked on bottom by 17 Feb 70 BPH

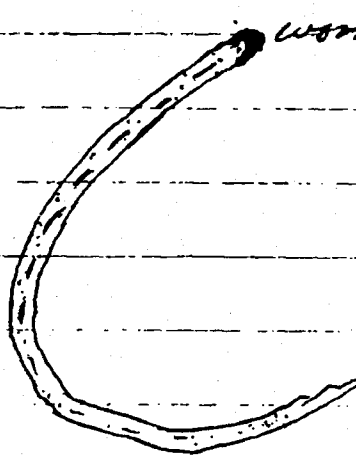

Microscope

- #2 no hairs - fibers only
- #4 fibers only
- #6 fibers only
- #7 fibers + one light brown narrow hair, no medulla, striated, intact root, tapered end
- #8 one light brown narrow hair, <sup>not like narrow #7</sup> no medulla, intact root, sword end, not as <sup>pointed</sup> tapered as #7.
- #9 fibers only
- #10 one fiber; one hair - bloody

Not to 300 thru 308  
305 thru 313 covered

#13 one hair - bloody

<sup>E-5</sup>  
#13 approx 1 inch - curved - worn end

narrow diameter  
the same width  
fine pigment gran  
interrupted medulla  
darker color along  
sides

E305 = too black

E306 = grey-brown diam. varies & tapered

E307 = grey-brown

E308 = " " tapered

E309 = " " "

E310 = " " diam. varies - tapered - worn end but not  
like #13

E311

E317 black brown - diam. varies;

E318 medulla too heavy; diam. varies; tapered

E-5 #13 compared to ~~306~~ 306

mounted <sup>E-5</sup> between the two hairs of 306. The  
two hairs of 306 were had more pts of similar  
to each other than <sup>E-5</sup> had to them. Some areas

are quite similar but the complex case is not  
same as 306. - Calling Negative. 306 is tapered  
slightly and <sup>E-5</sup> is all the same width and color.

#5 799 not similar to 300 thru 308

#10 <sup>E-4</sup> approx 3" long - longer than any  
from E 300 thru 308  
medulla cont. & distinct for the most part  
not intact; tapered end (rounded) \*  
distinct pigment granules  
not to E 300 thru 308; ~ to #1 except  
for length, but probably head hair.

#1 long head hair - bloody - long tapered end  
not cut; distinct medulla interrupted; \*  
shrunken root; light brown chromatin.

Comparing <sup>E-5</sup> #3 - none of the hairs 300-308 had  
the same type of wavy, even shaft end.

did not label all the other visib. cont. fibers &  
hairs (#1, #2, #8) but gave #'s & slides correspond  
to these #'s, since they are not going to  
be reported by me.

#7
